## Education

B.TECH (CSE) — I.K. Gujral Punjab Technical University — **2021-2025**

## Experience

**Coox** — **September 2025 – Present**

***Full Stack Developer***

- Designed and developed scalable full-stack applications using **React.js, Node.js, Express.js, and MySQL**, building reusable frontend components and high-performance RESTful APIs for large-scale applications.
- Optimized **MySQL** database performance by improving SQL queries, joins, indexing, and data-access patterns, reducing unnecessary database operations and improving API response time.
- Implemented secure authentication and authorization using **OAuth 2.0 and JWT**, with role-based access control (RBAC) for protecting application resources and APIs.
- Containerized applications using **Docker** and followed Git-based development workflows with **GitHub**; collaborated with the team through **Jira** for task tracking, code integration, bug fixing, and sprint-based development.

## Projects

**Aug 2024**

***Care-Track: Health Finance Management System***

- Designed and built a scalable backend with **Node.js** and **Express.js** for managing user finance, secure login via **OAuth**, and real-time expense analytics.
- Integrated **payment gateway** services and implemented secure **webhook** handling for real-time payment verification and transaction status updates.
- Integrated **AWS** services for cloud storage and **Firebase** synchronization while designing secure **RESTful APIs** with authentication, authorization, and middleware-based error handling for improved scalability and maintainability.
- ***Node.js, JavaScript, Express.js, Firebase, OAuth, AWS, NodeMailer, REST APIs, Payment Integration, Webhooks***

**march 2025**

***QR-Based Restaurant Management & Ordering System***

- Built a scalable multi-restaurant platform with **QR-based table ordering**, menu browsing, cart, and order placement.
- Developed **RESTful APIs** using **Node.js, Express.js, and MySQL** for restaurants, tables, menus, customers, and orders with role-based access control.
- Implemented real-time order tracking using **Socket.IO** and integrated **payment webhooks** for transaction verification and order-status updates.
- Integrated **Cloudinary/Multer** for image uploads with an **ImageService abstraction**, along with **JWT authentication, Zod validation**, and centralized error handling.

## Technical Skills

- **Programming Languages:** Java, JavaScript (ES6+)
- **Frontend:** React.js, HTML, CSS, Tailwind CSS
- **REST & Auth:** RESTful APIs, JWT Authentication, Secure API Design
- **DSA & Concepts:** Arrays, Strings, Linked Lists, Trees, Greedy Algorithms, OOPs
- **Backend:** Node.js, Express.js, Spring Boot, Spring MVC, Spring Security, Hibernate, JPA
- **Databases:** MySQL, MongoDB
- **Tools & Platforms:** Git, IntelliJ IDEA, VS Code, Postman, WebSocket
- **Puppeteer, Payment Integration, Webhooks, Redis, AWS (EC2, RDS)**

## Achievements

- Secured 1st rank in coding hackathon organized by O7 Solution at PTU Jalandhar.
- Solved 500+ coding problems on LeetCode, HackerRank, and GeeksforGeeks, focusing on Data Structures and Algorithms.
